

## The Consolidation Solution Kit

### Overview

If your organization requires financial consolidation, here is an option that eliminates a large portion of the 'build' – out of the box functionality from the Performance Analytics Consolidation Solution Kit (CSK). This pre-built solution has been proven to significantly reduce the time and cost to implement SAP Business Planning and Consolidation (BPC) solutions, providing a higher return on investment and customer satisfaction. The CSK is the only consolidation application to be certified by SAP to provide a complete solution for financial consolidation and reporting. It comes with pre-defined dimensionality, reports, data input forms, workflow and much more. Customers can be up and running with BPC in weeks and gain the benefit of years of experience that is now built into the Solution Kit.

### Certification

The SAP BPC Consolidation Solution Kit is the only partner led consolidation solution certified by SAP as a Rapid Deployment Solution. And it is available for both the Microsoft and NetWeaver platforms of BPC.

### Benefits

- Fixed Fee, Fixed Scope & Fixed Timeline
- End-to-end consolidation process through pre-configured functionality to include:
- Process compliance and consistency
- Complete financial statement report library
- Easily customized to specific organizational needs

Organizations face demands to cut costs, improve performance, streamline processes and increase productivity within a constrained time frame. The Performance Analytics Consolidation Solution Kit is a preconfigured financial consolidation application platform for the SAP BPC solution, designed to help your organization accelerate implementation and increase ROI.
